ColdCaller Dashboard

AI-Powered Sales Acceleration Platform featuring Hybrid RAG Chatbot & Enterprise VOIP

🚀 Executive Summary

ColdCaller Dashboard is a state-of-the-art sales acceleration platform designed to empower sales professionals. It integrates high-fidelity VOIP calling, real-time lead management, and a cutting-edge **Hybrid RAG (Retrieval-Augmented Generation) Chatbot**. Built with a modern tech stack, it solves the challenge of fragmented sales tools by providing a unified interface for calling, data management, and instant knowledge retrieval.

✨ Key Features

🤖 Hybrid RAG Chatbot

Powered by **Gemini 1.5 Pro**. Intelligently routes queries between internal documentation (blue) and live web search (green) to provide instant, accurate answers.

📞 Enterprise VOIP

Production-grade calling via **Twilio Voice API**. Features real-time transcription, call recording, hold/mute controls, and an integrated dial pad.

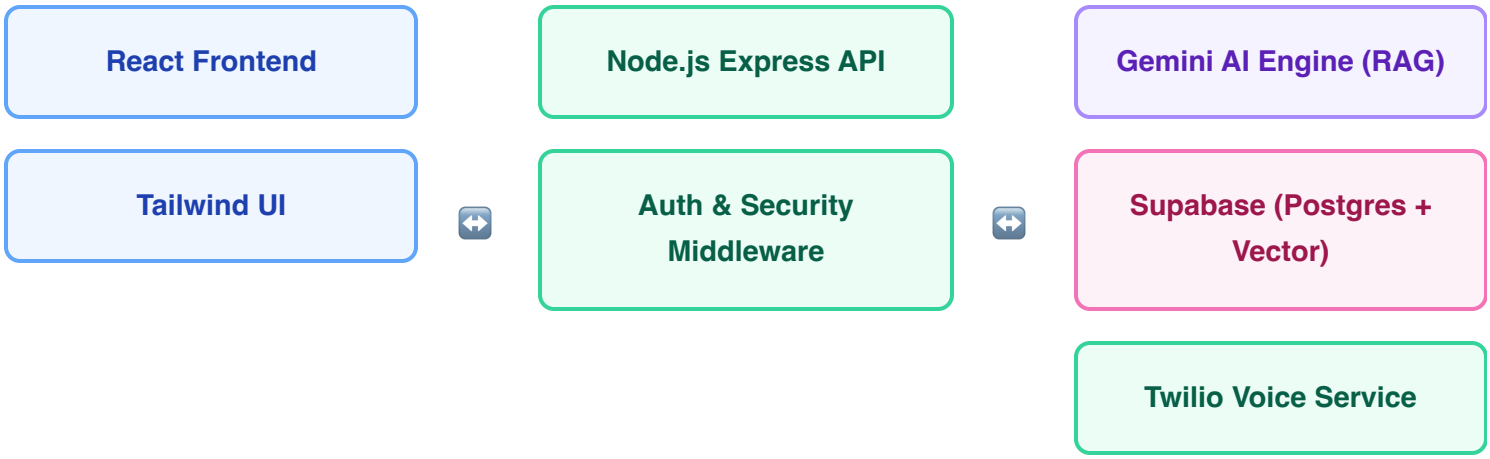
👥 Advanced CRM

Full-cycle lead management with **Supabase**. Real-time updates via WebSockets, lead scoring, and detailed interaction logs.

📊 Deep Analytics

Comprehensive dashboard tracking conversion rates, call durations, and agent performance metrics visually.

System Architecture



Modern Microservices-inspired Monolithic Architecture with Cloud Integrations

Technology Stack

React 19 | Node.js 18+ | Tailwind CSS | Supabase | Google Gemini AI | Twilio API | WebSockets | Express.js | Jest | Vector Embeddings
